

CIELO24 INTERACTIVE TRANSCRIPT WIDGET INSTRUCTIONS FOR KALTURA MEDIASPACE

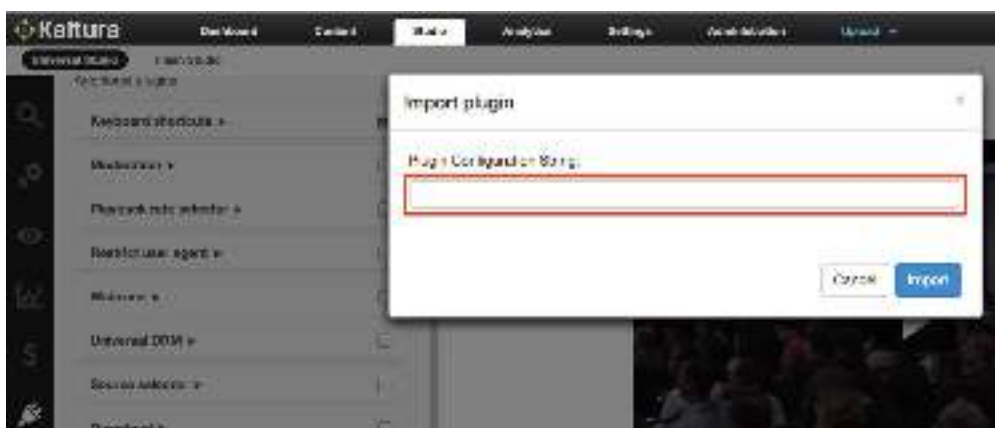

The cielo24 interactive transcription widget and media data player for Kaltura MediaSpace: <http://knowledge.kaltura.com/sites/default/files/media%20player.pdf>

Instructions for setting up a player:

- In 'Studio' > 'Universal Studio' > Edit your favorite player, create new player, or duplicate your favorite player
 - Click on Plugin icon on bottom left
 - Click 'Import Plugin'

- A dialogue box will pop up to insert a string:

- Place the string below in the 'Plugin Configuration String':

```
onPageJs1=//mediadataplayer-cdn.cielo24.com/v2/stable/kaltura.js&cielo24Transcriptions.
DynaTransWindowSize=400&cielo24Transcriptions.DynaTransWindowTitle=MediaDataPlay-
er&cielo24Transcriptions.DynaTransClientLogo=https://mediadataplayer-cdn.cielo24.com/
v2/stable/widget/img/logo-transparent.png&cielo24Transcriptions.DynaTransHideGear=-
FALSE&cielo24Transcriptions.DynaTransHideShare=FALSE&cielo24Transcriptions.DynaTransHi-
dePrint=FALSE&cielo24Transcriptions.DynaTransHideDownload=FALSE&cielo24Transcriptions.
DynaTransHideLeftMenu=FALSE&cielo24Transcriptions.DynaTransHideSpeakers=FALSE&ciel-
o24Transcriptions.DynaTransHideTimestamps=TRUE&cielo24Transcriptions.DynaTransAuto-
scrollOff=FALSE&cielo24Transcriptions.DynaTransWidgetUrl=https://mediadataplayer-cdn.
cielo24.com/v2/stable/widget/widget.html&cielo24Transcriptions.DynaTransHideMetaTop-
ics=FALSE&cielo24Transcriptions.DynaTransHideMetaSpeakers=FALSE&cielo24Transcrip-
tions.DynaTransHideMetaKeywords=FALSE&cielo24Transcriptions.DynaTransHideFooter=-
FALSE&cielo24Transcriptions.DynaTranscriptStartsHidden=FALSE&cielo24Transcriptions.
DynaTransEnableAdditionalCSS=TRUE&cielo24Transcriptions.DynaTransAdditionalCSS=.
action-edit#wrapper.video{margin-bottom:0}#mediaContainer#wrapper.video{height:auto;pad-
ding-bottom:0!important;padding-top:0!important}#mediaContainer#wrapper.video#playerdiv.
kWidgetIframeContainer{position:relative;padding-bottom:56.25%;left:auto;top:auto}.entryTitle,.
stat_data{margin-top:20px}#mediaContainer#wrapper.video#playerdiv#cielo24-iframe-wrap-
per-kplayer{background:#FFF;height:auto;left:auto;position:relative;top:auto;width:auto}#me-
diaContainer#wrapper.video#player#cielo24-iframe-wrapper-kplayeriframe{background-col-
or:#FFF;height:inherit;left:unset;position:unset;top:unset;width:none}
```

- Under 'UI variables' you can now edit any values to customize the player display.

Variable	Definition	Default	Default Meaning
cielo24Transcriptions.Dyna-TransWindowSize	Size of Widget	400	Sized at 400px
cielo24Transcriptions.Dyna-TransWindowTitle	Name of Widget (Displayed in Footer)	Media Data Player	Label displayed on widget
cielo24Transcriptions.Dyna-TransClientLogo	Logo Displayed on right side of Footer	https://mediadataplayer-cdn.cielo24.com/v2/stable/widget/img/logo-transparent.png	Logo link displayed on widget
cielo24Transcriptions.Dyna-TransHideGear	Settings Gear (required for usability)	FALSE	Settings Gear is defaulted to display
cielo24Transcriptions.Dyna-TransHideShare	Social Sharing icon Display	FALSE	Social Share is defaulted to display
cielo24Transcriptions.Dyna-TransHidePrint	Transcript Print icon Display	FALSE	Transcript Print icon is defaulted to display enabling printing of transcript
cielo24Transcriptions.Dyna-TransHideDownload	Transcript Download icon Display	FALSE	Transcript Download icon is defaulted to display enabling download of text transcript

cielo24Transcriptions.Dyna-TransHideLeftMenu	Tag icon to Display Media Intelligence (only when available for video)	FALSE	Tag icon defaulted to display media intelligence when the video contains media data, if it doesn't contain media data it will dynamically hide.
cielo24Transcriptions.Dyna-TransHideSpeakers	Default Display of Speaker Name Display within Interactive Transcript	FALSE	Speaker name will only appear if speakers have been identified within the transcript. Setting configured is default value for display, it's still configurable via Gear icon interactively.
cielo24Transcriptions.Dyna-TransHideTimestamps	Default Display of Timestamp Display per Speaker Change or Text Block	TRUE	Timestamps will only appear if speakers have been identified within the transcript. Setting configured is default value for display, it's still configurable via Gear icon interactively.
cielo24Transcriptions.Dyna-TransAutoscrollOff	Default Behavior for Autoscroll of Interactive Transcript	FALSE	Autoscroll is the scrolling of the transcript with the playhead. The setting configured is default behavior, it's still configurable via Gear icon interactively.
cielo24Transcriptions.Dyna-TransHideMetaTopics	Media Intelligence: Display Topics within 'Tags' icon	FALSE	This configures the 'capability' to display. Widget is intelligent to only display dropdown under 'Tags' icon if a value is present in the video. On by default.
cielo24Transcriptions.Dyna-TransHideMetaSpeakers	Media Intelligence: Display Speakers within 'Tags' icon	FALSE	This configures the 'capability' to display. Widget is intelligent to only display dropdown under 'Tags' icon if a value is present in the video. On by default.
cielo24Transcriptions.Dyna-TransHideMetaKeywords	Media Intelligence: Display Keywords within 'Tags' icon	FALSE	This configures the 'capability' to display. Widget is intelligent to only display dropdown under 'Tags' icon if a value is present in the video. On by default.
cielo24Transcriptions.Dyna-TransTargetDivId	Div name used to display widget in a target div for reference on web page	N/A	Not used by default, only used if hosting on a web page to display the interactive transcript widget in a particular location on the page. Value is 'div' name.

cielo24Transcriptions.DynaTransAdditionalCSS	Required for using interactive transcript widget in KMS	<pre>.action-edit #wrapper. video{margin-bottom:0}#mediaContainer #wrapper. video{height:auto;padding-bottom:0 !important;padding-top:0 !important}#mediaContainer #wrapper. video #player div. kWidgetIframeContainer{position:relative;padding-bottom:56.25%;left:auto;top:auto}. entryTitle,.stat_data{-margin-top:20px}#mediaContainer #wrapper. video #player div#cielo24-iframe-wrapper-kplayer{background:#FFF;height:auto;left:auto;position:relative;top:auto;width:auto}#mediaContainer #wrapper.video #player #cielo24-iframe-wrapper-kplayer-iframe{background-color:#FFF;height:inherit;left:unset;position:unset;top:unset;width:none} body{background-color:white}</pre>	Value only used if EnableAdditionalCSS is set to true. Required to display widget in KMS.
cielo24Transcriptions.DynaTransEnableAdditionalCSS	Required 'True' for use of interactive transcript widget within KMS	TRUE	Value determines if AdditionalCSS is referenced. Only used in KMS rendering, compatible with KMC.
cielo24Transcriptions.DynaTransSearchVar	To pass search term as a parameter into interactive transcript widget	N/A	Variable not set by default. Default name is 'cielo24search' to override set value for key variable.
cielo24Transcriptions.DynaTransScrollbar	Value for Scrollbar search result heatmap display	N/A	By default vertical heatmap/scrollbar is displayed. To use horizontal heatmap for search results set value to 'horizontal', omit for vertical only rendering.
cielo24Transcriptions.DynaTranscriptStartsHidden	Transcript panel hidden	FALSE	Variable controls whether the Interactive Transcript Panel is either shown or hidden by default.

cielo24 Interactive Transcript Widget Instructions for iFrame Embed

- The instructions for creating an iFrame supported version of the widget for embedding content is similar to the Mediaspace setup. The value to copy into “Plugin Configuration String’ is different:

```
IframeCustomPluginJs1=//mediadataplayer-cdn.cielo24.com/v2/stable/kaltura.js&cielo24Transcriptions.DynaTransWindowHeight=400&cielo24Transcriptions.DynaTransWindowTitle=MediaDataPlayer&cielo24Transcriptions.DynaTransClientLogo=https://mediadataplayer-cdn.cielo24.com/v2/stable/widget/img/logo-transparent.png&cielo24Transcriptions.DynaTransHideGear=FALSE&cielo24Transcriptions.DynaTransHideShare=FALSE&cielo24Transcriptions.DynaTransHidePrint=FALSE&cielo24Transcriptions.DynaTransHideDownload=FALSE&cielo24Transcriptions.DynaTransHideLeftMenu=FALSE&cielo24Transcriptions.DynaTransHideSpeakers=FALSE&cielo24Transcriptions.DynaTransHideTimestamps=TRUE&cielo24Transcriptions.DynaTransAuto-scrollOff=FALSE&cielo24Transcriptions.DynaTransWidgetUrl=https://mediadataplayer-cdn.cielo24.com/v2/stable/widget/widget.html&cielo24Transcriptions.DynaTransHideMetaTopics=FALSE&cielo24Transcriptions.DynaTransHideMetaSpeakers=FALSE&cielo24Transcriptions.DynaTransHideMetaKeywords=FALSE&cielo24Transcriptions.DynaTransEnableAdditionalCSS=TRUE&cielo24Transcriptions.DynaTransHideFooter=FALSE&cielo24Transcriptions.DynaTranscriptStartsHidden=FALSE&cielo24Transcriptions.DynaTransAdditionalCSS=.action-edit#wrapper.video{margin-bottom:0}#mediaContainer#wrapper.video{height:auto;padding-bottom:0!important;padding-top:0!important}#mediaContainer#wrapper.video#playerdiv.kWidgetIframeContainer{position:relative;padding-bottom:56.25%;left:auto;top:auto}.entryTitle,.stat_data{margin-top:20px}#mediaContainer#wrapper.video#playerdiv#cielo24-iframe-wrapper-kplayer{background:#FFF;height:auto;left:auto;position:relative;top:auto;width:auto}#mediaContainer#wrapper.video#player#cielo24-iframe-wrapper-kplayer-iframe{background-color:#FFF;height:inherit;left:unset;position:unset;top:unset;width:none}body{background-color:white}&onPageCss1=//mediadataplayer-cdn.cielo24.com/v2/beta/widget/css/kaltura/iframeEmbedOnPageStyle.css
```

- To verify the iframe embed widget is configured correctly review the following differences under UI variables compared to the Mediaspace version of the widget:
 - In UI Variables, Instead of *onPageJs1*, the key is *IframeCustomPluginJs1*
 - A new UI Variable, key - *onPageCss1* is set to value - *//mediadataplayer-cdn.cielo24.com/v2/stable/widget/css/kaltura/iframeEmbedOnPageStyle.css*
 - Additional Style declaration `body{background-color:white}` added to additionalCSS:

```
.action-edit#wrapper.video{margin-bottom:0}#mediaContainer#wrapper.video{height:auto;padding-bottom:0!important}#mediaContainer#wrapper.video#playerdiv.kWidgetIframeContainer{position:relative;height:400px;left:auto;top:auto}.entryTitle,.stat_data{margin-top:20px}#mediaContainer#wrapper.video#playerdiv#cielo24-iframe-wrapper-kplayer{background:#FFF;height:auto;left:auto;position:relative;top:auto;width:auto}#mediaContainer#wrapper.video#player#cielo24-iframe-wrapper-kplayer-iframe{background-color:#FFF;height:inherit;left:unset;position:unset;top:unset;width:none}body{background-color:white}
```

- To update the embed sizes for 'browseandembed' (Mashup) or 'embed' functions either in the KAF as the default, or per embedded video to support the additional widget size (ex. 400px) configured for the interactive transcript player add the widget height to sizes:
 - Small: 304 x 595
 - Medium: 400 x 650
 - Large: 608 x 765
- Once setup, copy an embed code set embed type to 'iframe' and select *HTTPS support*.
 - If you have set the 'embed' defaults in KAF the height will already be adjusted or copy the iframe embed code and manipulate directly.

- To have the height and width dynamic (responsive) within iFrame use adjust the code:
 - By default, the embed code generated from Kaltura will look like this:

```
<iframe src="<your link from generated embed code>" width="560" height="395" allow-
fullscreen webkitallowfullscreen mozAllowFullScreen frameborder="0" style="width: 560px;
height: 395px;" itemprop="video" itemscope itemType="http://schema.org/VideoObject">
<span itemprop="name" content="Your title"></span>
<span itemprop="description" content="Your Description"></span>
<span itemprop="duration" content="189"></span><span itemprop="thumbnail" con-
tent="<your link from generated embed code>"></span>
<span itemprop="width" content="560"></span>
<span itemprop="height" content="395"></span>
</iframe>
```
 - Update the embed code per below (note: the updated bits of code are in purple):

```
<div style="position: relative; padding-bottom: 56.25%; height: 0; overflow: hidden;">
<div style="position: absolute; top: 0; left: 0; width: 100%; height: 100%;">
<div style="width: 100%; height: 100%;"><iframe title="Your Title" src="your same link from
generated embed code" width="100%" height="100%" allowfullscreen="allowfullscreen"
webkitallowfullscreen="webkitallowfullscreen" mozallowfullscreen="mozallowfullscreen">
</iframe>
</div>
</div>
</div>
```
